

Holstein ID Tags For Registration

When used for registration, Holstein Tag ID program requires a combination of two approved identifiers, one of which must be a visible Large or Maxi tag. Our policy requires at least one tag be applied at birth and a second tag within six months of age.

Tag 1 (Official 840)	Tag 2 (For Tag ID registration)
RFID 840 Button Tag	Large or Maxi tag (may be a custom tag)
Mini Round 840 Button Tag	Large or Maxi tag (may be a custom tag)

Basic ID

- A low cost program to track lineage on non-registered animals and achieve genetic goals
- Simply identify the animal with at least one Holstein official 840 tag
- Enroll for only \$2 per animal using EASY

EASY ID, Holstein

Association USA's Electronic Application **SY**stem, lets you submit registration or Basic ID applications and orders for custom tags over the internet. If using Tag ID, customers can easily set up and assign varying tag styles to differentiate groups of animals.

EASY ID offers effortless importation of calf data from the following herd management programs: PC Dart, DHI PLUS, DC 305/Scout, DairyQuest, Westfalia Dairy Plan 5.0, CowSearch, BarnOwl/Heifer 98, DairyDat, HerdPro 5.0, and Dairy Enterprises. EASY ID maintains a database with all records that were submitted.

Individual Animal Custom ID Tags

When you use EASY to submit animal ID info electronically to Holstein, EASY can place an individual animal custom ID tag order at the same time!

How to install EASY (free of charge):

Download at www.holsteinusa.com

EASY SUPPORT – 800.952.5200, Ext. 4205

**Note: You must have a high speed internet connection to download this program. If you are using a dial-up connection, please call 800.952.5200, and we can mail you a CD of the program.*

Enlight Animals may also be officially identified online through the Enlight® genetic management tool, at www.enlightdairy.com. Under the ID Animals tab of the web site, users may submit the animals for official identification with Holstein Association USA, including ordering custom tags for those animals, and may order genomic testing materials for animals at the time of ID, or for animals already officially identified with the Association. Like the desktop version of EASY ID, animal information may be imported from a user's herd management software if they prefer.

EFFECTIVE FEBRUARY 17, 2023

Holstein ID tags are part of an identification system designed to provide you with a simple, efficient, and cost-effective solution for identifying animals.

- Permanent
- Tamper-proof
- Fade-resistant
- Customizable

Inventory Tags

Inventory tags, applied to animals when they are born, must be the official 840 tags, either a visual-only or electronic (Radio Frequency ID, or RFID) version. The official tags are marked with the USDA shield and the statement "Unlawful to remove." Only one tag, applied at birth, needs to be official. Additional inventory tags will have the same 840 number without the official shield. You must provide a beginning herd management number.

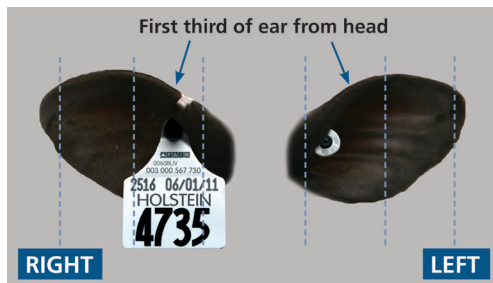

Custom Tags

Custom tags include the same information as on the inventory tags, but allow producers to add unique animal or farm information. Identification tags, with customized information, are typically used as a second animal identifier when used with an inventory tag.

Order your individual animal custom ID tags through the Holstein Association's Electronic Application System (EASY) software.

Correct Tag Placement

The correct location for placing Holstein ID tags is pictured below. Tags are retained best when this practice is followed.
